Guess what...it is challenge time again, and you know what that means. Get your family together and complete Challenge #9 to get 10 points for your class. Don’t forget to look at the ENERGY Meters to see if your class is in the lead after challenge #8, and work on being a good team player by cheering your class on. What are you waiting for? Get going!

We Challenge You To...
Take Your Family on a Bug Hunt!

Challenge: Put on your tennis shoes, grab your magnifying glass and get going! We challenge you to go on a bug hunt with your family, in your neighborhood or local park. Keep your eyes peeled for insects, spiders, bugs, etc. When you see something, stop and talk about the kind of mouth you think that it has, and what kind of food it might eat with that mouth. When you get back, draw a picture of your favorite insect in the space provided and answer the questions below.

My family’s favorite insect was...

1. What type of mouth do you think this insect has and why? ____________________________

2. Considering its mouth type, what kind of food would this insect eat? ____________________________

Don’t forget to return this completed sheet to your teacher by the end of next week to get points for your class!
